ACTIVITY : HST --- Protocol (Protocol Development)

SCHEDULED START: Oct-01-2002

SCHEDULED COMPLETION: Sep-30-2005

ACTUAL COMPLETION:

Childhood Leukemia and Birth Defects

ATSDR is planning to conduct an epidemiologic study to further explore the relationship between contaminated drinking water and birth defects or childhood cancer among the survey population. The protocol has been written and sent for peer review. Currently DHS is waiting on approval on the OMB package. DHS continues to contact physicians for participant records.
